

AUTOMATIC FLAT BOXES

The Automatic Flat Boxes reduce the need to push the compound on to the wall. By engaging, the box springs put pressure on the compound chamber requiring only a light push to operate the box. Well-built and fine-tuned to offer great flat joints for years.

Item No.

INSIDE TRACK BOXES

The key advantage of having wheels inside the side plate is in running butt joints and navigating obstacles such as potlights and door jams. The key is having the wheels inside the coating path of the box blade.
